

Dear Candidate,

Write a program to Add, Edit, Delete and listing of employees and following fields should be covered in it:

1. Employee name
2. Email address
3. Gender
4. Contact number
5. Address
6. Photo
7. Joining date
8. Birthdate
9. Department
10. Education
11. Experience
12. Hobby

Listing Screen should have following fields with search & sorting functionality. Search functionality should be worked without refreshing a page.

1. Photo
2. Employee name
3. Email address
4. Contact Number
5. Gender
6. Department
7. Birthdate (dd-mm-YYYY)

### **Instructions**

1. Email must be a unique in the employee\_info table and you have to verify email through the Ajax call
2. You have to create folder with your full name e.g. Your name is Rahul Sharma then folder name should be rahul\_sharma and also you have to create Database with same name as folder name i.e. rahul\_sharma
3. You have to store all the information into employee\_info table
4. For Department, Hobby & Education's dropdown you to create table for the same and get data from respective tables.

**All the best**
